The Health Behavior and Decision Making Credit Course Addition came before the committee for approval. Imke Casey presented the Course Addition to the committee. Dr. Sligh pointed out that the committee needed clarification in order for the course to be brought forth before the committee for approval. This course was tabled until the November Curriculum Meeting.

Dr. Michael Morse explained that the Science Fiction Cinema course is basically a course that covers the genre of Science Fiction Movies that have been put together by Scott Hopkins. It will be a Humanities Course which in some ways complements the science Fiction Literature Course that is offered by the English department. This will be tied in with what is currently cultural. Emails were sent out to faculty members who were interested in teaching the class both at Leesburg and South Lake campuses. Scott Hopkins and other instructors came up with some classic movies that would fit with the class. The general consensus is that this will be a very popular class.

- **Motion:** Dr. Greata/Danny Triolo
- **Action:** Approved

Dr. Sligh requested a motion to group numbers 3.3, 3.4, and 3.5 together because they are all related and a part of the Early Childhood Education program.

- **Motion:** Dr. Rager/Irene Owens
- **Action:** Approved
Dr. Greata expressed to the committee that 3.3 and 3.4 are early childhood special needs courses. A 36 credit certificate was approved last year and these two courses were on that certificate. One certificate has to do with teaching special needs learners and the other is a practicum where the students goes in and work with special needs student. Dr. Sligh seized on the opportunity to enlighten the committee on the differences between the certificate and the degree in this particular situation by explaining that students who receives a certificate in these courses can move on to get their degrees if they chose to do so.

As far as LIN 2740 Applied Linguistic is concerned, it comes under the English Department. Dr. Greata, Dr. Rager and Dr. Jones are in the process of working on an articulation with the College of Central Florida that will allow our AA students and AS students in Early Childhood to go into their BS in Early Childhood Education. This BS leads to a teacher's certification with a reading endorsement and an ESOL endorsement. This particular course is not one that they offer in their final 36 credits. What this articulation will do is it will allow our students to graduate either with 63 credits with their AS or 60 credits with their AA. Once they graduate they stay here with us and earn up to 84 credits their junior year and fill in all the requirements that they need to enter final 36 hours of the BS which is not included in those 36 hours but it is a very important course in order to allow them to get their ESOL endorsement. College of Central Florida prefers that we teach this and if we teach this course we could get a lot of people from the school system who would want to take this course when they are working on their recertification. The district would be notified that this is available if passed so that this course could be available for their employees to take advantage of. This course would be offered under the English Department but would be handled through early childhood because of the link to that degree.
3.6 An Agenda request item from the Nursing Department was brought forth to the committee for information purpose.

The Nursing Department is changing the computer proficiency requirement that they are listing under their programs and their publication and our catalog. This is information that we want to be acknowledged through our committee so that it is a part of our minutes.

Dr. Sligh wanted everyone to be reminded that it is very important as we are doing all the paperwork that is required for proposals, we must be real careful about course level SLO's, Program level SLO's, all the Gen Ed competencies and all the rubrics that goes along with them. He stressed that we make sure that all proposals have all that is required. All agreed.

Action: Item brought forth to committee for information.
